

## Thank you for your download!

It is not obvious that you chose this livery.

There are so many providers and so many good Liveries because we are all the more that you have taken this.

Would you like to send us suggestions? Do you have suggestions for improvement? Then just write us! [serive@airlivus.com](mailto:serive@airlivus.com) or visit our pages on Facebook or Instagram. Simply enter "Airlivus" in the search and you will find us 😊

## Installation

1. Unpack the file with winzip or winrar.
2. Export the wrapped folder to your folder  
\\ X-Plane 11 \\ Aircraft \\ "Name of your aircraft" \\ liveries
3. Enjoy your new livery in X-Plane 😊

## Installation (Optional)

You have the possibility to expand your cockpit or cabin with the attached PNG files. You do not have to do this, but if you like, follow the steps for the installation.

4. Open the folder "Optional"
5. Copy the attached png files.
6. Change to the folder "objects"
7. Paste the copied files
8. DONE!

**!! If there are problems in the simulator contact us with a picture. We try to answer your question as soon as possible !!**

Have fun with your new Livery!
